How to Set Up An Automatic Interface Between Your eServices Safety Education and Seminars in AOPA and FAA

The document illustrates how to set up an automatic interface between the Civil Air Patrol's eServices Safety Management System (SMS) and safety education programs with the FAA Safety Team (FAAST) website and AOPA's Air Safety Foundation.

The most important task is getting set up in the FAA Safety Team website. To do this, click on this link. http://www.faasafety.gov/

When you click the link, you will see a screen similar to the one below.

If you already have an account with FAASafety.gov, just provide the login information and click the Go button.

If you do not have an account with FAASafety.gov, just click the link to create an account.

# How to Set Up An Automatic Interface Between Your eServices Safety Education and Seminars in AOPA and FAA

Once you are logged in, click on My Preferences and Profile. This is located on the right side of your screen, right where you logged in.

This will take you to the Account Preferences window. Click on the tab named "Other."

In the screen below, just enter your CAPID then click the Save button.

How to Set Up An Automatic Interface Between Your eServices Safety Education and Seminars in AOPA and FAA

This is all there is to it. Whenever you attend an FAA Safety seminar or take an online course, you will automatically get eServices Online Safety Education credit.

CAPF-5 check rides are FAA Wings eligible. For more information, please click the link below.
http://williamjdoylejr.net/FAA_Wings/How_to_Get_FAA_Wings_Credit_for_Your_CAPF5.pdf

Whenever you take your CAPF-5, you can submit an online request within FAASafety.gov to the CAP check pilot who administered your check ride. Assuming that you passed your CAPF-5 and that you took one or two AOPA or FAA seminars or courses during the year, you will get a Wings Phase and a BFR.

Likewise, CAP Half-Day ground schools also qualify for FAA Wings credit. Examples are G1000 ground schools, Safety Down Days and the ground component of flight clinics.

AOPA ASF online courses are even easier. Each time you pass the end-of-course quiz, you are prompted for your FAA pilot certificate number. After you provide your pilot certificate number, AOPA interfaces with FAASafety.gov and automatically updates your FAA safety records. Once your FAA safety records update, you will get eServices Online Safety Education credit.

eServices updates the SMS Online Safety Education records overnight. After you first set this up, the FAA Safety system will upload a complete transcript of all FAA safety training into your CAP safety training record in eServices.

How to Set Up An Automatic Interface Between Your eServices Safety Education and Seminars in AOPA and FAA

You can check your Safety Education Training Records to see if your seminar or course was updated into your records.
